

PROFILE SUMMARY

Computer Science undergraduate at B V Raju Institute of Technology with strong skills in full-stack development and AI-based applications. Proficient in React, Node.js, Python, and Firebase, with hands-on experience building scalable, real-world projects in domains like education and mental health. Demonstrates strong problem-solving ability, logical thinking, and a focus on user-centric solutions. Seeking internship opportunities to apply technical skills, contribute to impactful projects, and gain practical industry experience.

EDUCATION

- BV Raju Institute of Technology, Narsapur** Telangana, India
Bachelor of Technology in Computer Science and Engineering (GPA: 9.34) Aug 2024 – Jul 2028
- Sri Chaitanya Junior College** Telangana, India
Intermediate (Score: 966/1000) 2024
- Sri Chaitanya Techno School** Telangana, India
Secondary Education (GPA: 9.8) 2022

SKILLS SUMMARY

Languages	C, Python, Java, JavaScript, SQL
Web Technologies	HTML, CSS, React.js, Node.js, Tailwind CSS, MongoDB
Tools	Git, GitHub, VS Code, Jupyter Notebook, Postman
Libraries	Pandas, NumPy, Matplotlib, NLTK, SpaCy, OpenCV
Platforms	Vercel, Firebase, MySQL, Docker

PROJECTS

- StudyGuardian AI – Real-Time Study Productivity Assistant:** AI-powered computer vision system for monitoring study focus and detecting user intent using webcam and input activity analysis.
Tech: Python, OpenCV, NumPy, Pandas, Matplotlib, pyttsx3
Implemented real-time face tracking, eye and head pose analysis, and intent detection (reading, writing, thinking, daydreaming) with productivity scoring and distraction detection.
- GramShiksha – AI-Powered Gamified Learning Platform:** Voice-first gamified learning platform designed for rural students with offline-first capabilities and adaptive learning.
Tech: React.js, Node.js, MongoDB, Gemini API, PWA
Developed real-time AI tutoring with concept simplification and implemented a knowledge-tree progression system with XP-based leveling.
- PaperPrism AI – Academic Paper Analysis and Visualization Tool:** AI-powered platform for analyzing academic papers and generating visual insights, trends, and statistics through an interactive user-friendly interface.
Tech: Python, FastAPI, Uvicorn, HTML, CSS, JavaScript
Built a scalable paper analysis tool that extracts key insights from research papers and visualizes data for better academic understanding.
- NyxWell – AI Mental Health and NGO Support Platform:** Platform addressing gaps in youth mental health through AI-driven emotional support and NGO integration.
Tech: HTML, CSS, JavaScript, Firebase, Grok API, NLP
Implemented sentiment analysis for real-time guidance and built a scalable backend using Firebase for authentication, database, and hosting.

ACHIEVEMENTS

- Top 5% in B.Tech CSE Academic Performance:** Ranked among the top 5% of the Computer Science Engineering batch based on overall academic excellence.
- Winner – 36-Hour Hackathon at CVR College of Engineering:** Developed “NyxWell,” a Youth Mental Health and Emotional Well-being Platform in a team of 4, organized by Google Developer Groups (GDG).
